

SETUP FORMS

This module is your master forms library that holds forms programming that print your forms. Your Forms Library is virtually endless and therefore it is not necessary to purge out dated programs. You can de-activate or make it so a form cannot be printed from the workbench. To de-activate a form go to the Forms Library in the Workbench. Go to **DEALS** section of the manual for complete instructions.

New forms programming may be requested from Versisoft Corporation.
